# **Starting BLIS**

To start the Basic Laboratory Information System, you must click on the bookmark saved on the web browser e.g. Google Chrome or Mozilla Firefox. You will then see a page requesting login information. You must then enter your credentials to proceed.

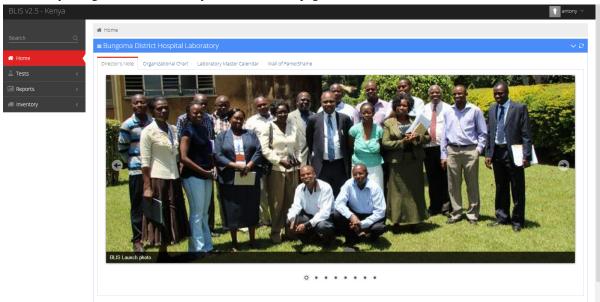

# Bungoma District Hospital Laboratory

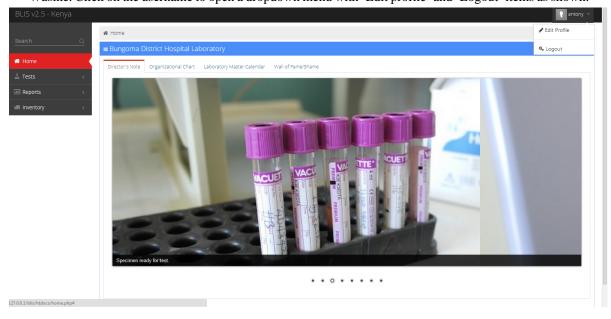

If you have forgotten your password, kindly contact the lab-in-charge for help

# **BLIS Technical Overview**

When you log in as a technician, you see this home page:

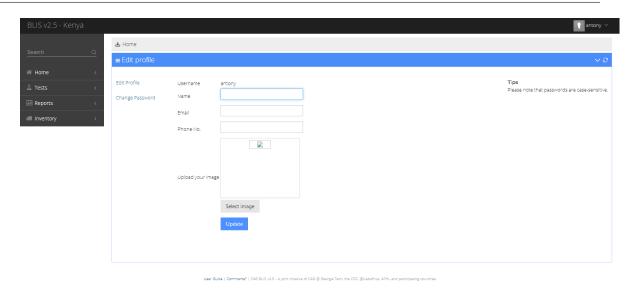

With Technician rights you can edit your profile to add or change email, phone, and profile picture. Username cannot be changed. Hover on the top right side of the top bar where you see your username e.g. Wasike. Click on the username to open a dropdown menu with 'Edit profile' and 'Logout' items as shown.

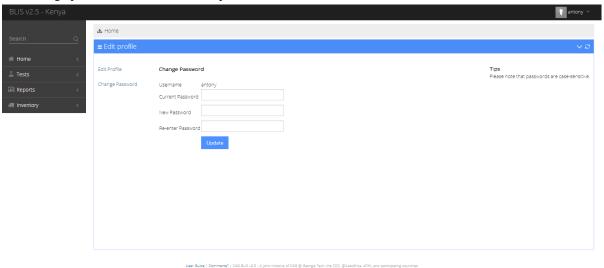

Once you click on 'Edit profile', you'll get the following form

Update your details as appropriate and click on the 'Update' button. To change your password, use the 'Change password' link on the 'Edit profile' form as shown.

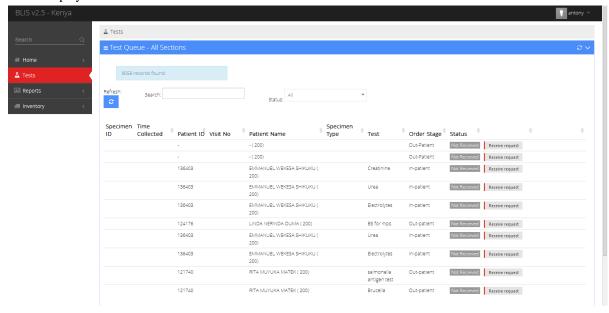

Fill in the form carefully and save the changes using the 'Update' button. Do not share your password with anyone else and please do not forget your password.

# **Tests**

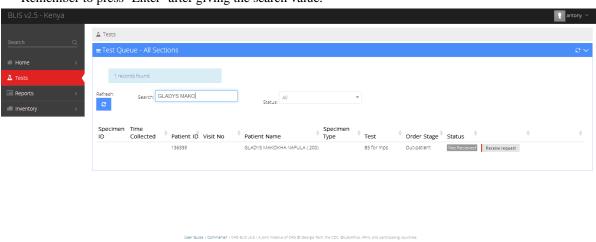

# **Receiving a Lab Request**

Click on the 'Tests' menu item on the right bar. A list of all pending lab requests from SANITAS shall be displayed as shown.

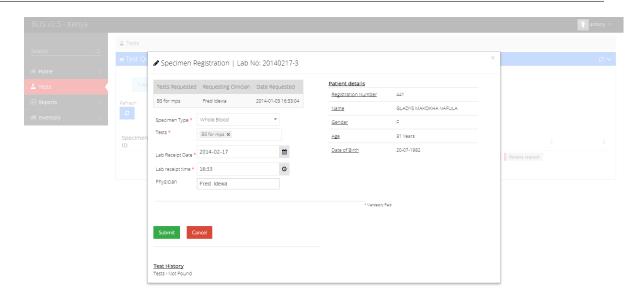

If you don't see the request among the listed, you can SEARCH for the patient using the PATIENT NUMBER or the PATIENT NAME as captured below.

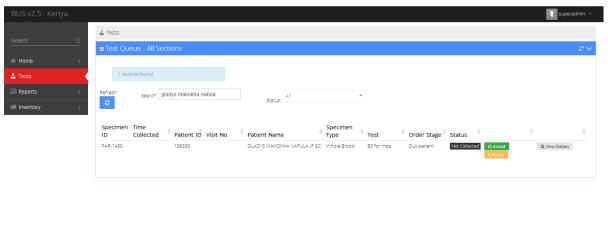

Remember to press 'Enter' after giving the search value.

Proceed to receive the request from using the 'Receive Lab Request' button on the far right of the row to get the following display

After submitting the details using 'Submit' button, the following page will appear to confirm successful submission

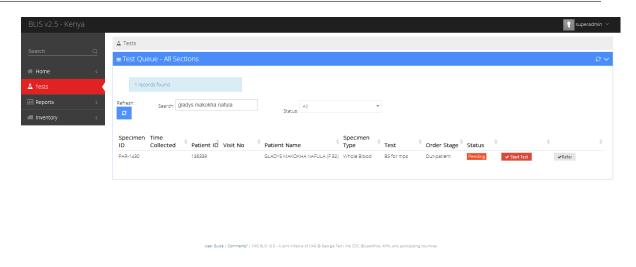

# **Accepting a Specimen**

Once you have received the request, you'll need to check the specimen for acceptance.

If acceptable, press the 'Accept' button as shown on the particular row of data to be directed to the following page.

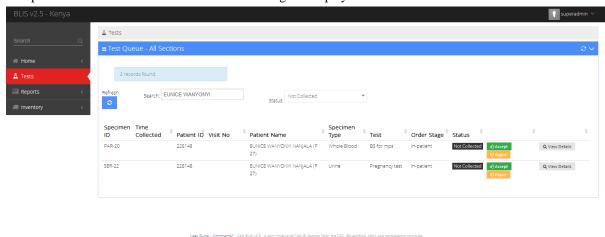

You'll get the specimen number in the format e.g. PAR-0001. PAR identifies the laboratory section the specimen shall be worked on and the numeric values represent the actual specimen identifier. Label the specimen with that specimen number provided. Sort the specimens ready for dispatch to the sections.

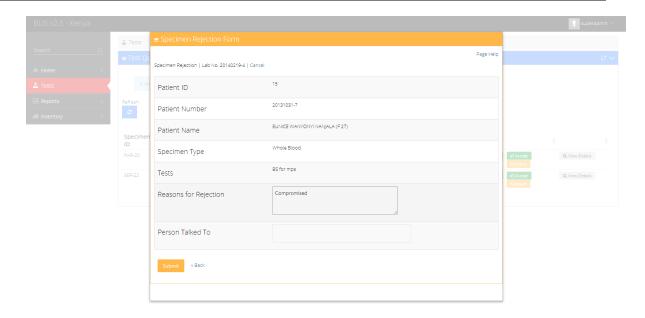

# Rejecting a Specimen

Sometimes, a specimen may fall short of the standards required for tests to be done on a sample, might be unlabeled, insufficient or due to other reasons especially with referral specimen. If so, search for the specimen as described above if not found among the displayed records.

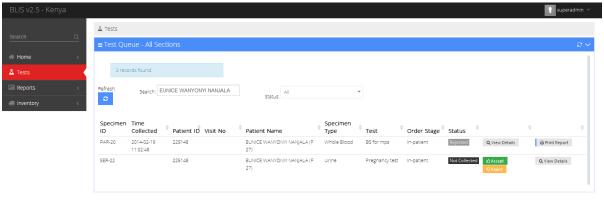

On the corresponding row of the specimen, press the 'Reject' button.

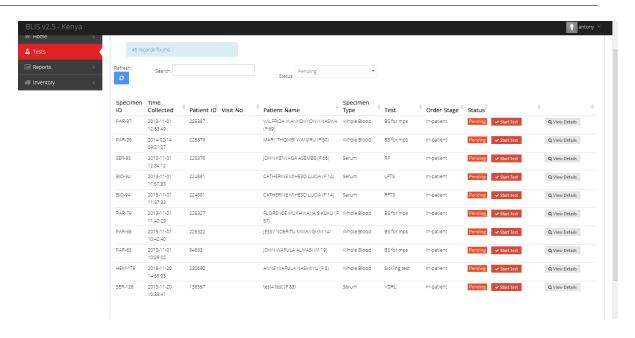

Fill in the form appropriately and submit it using the 'submit' button You have successfully rejected the specimen as captured below.

# **Starting a Test**

Search for the patient, test or specimen OR simply filter using the dropdown under 'Status' select box for 'Pending.

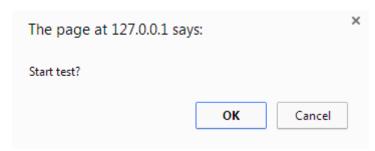

Search for the specimen

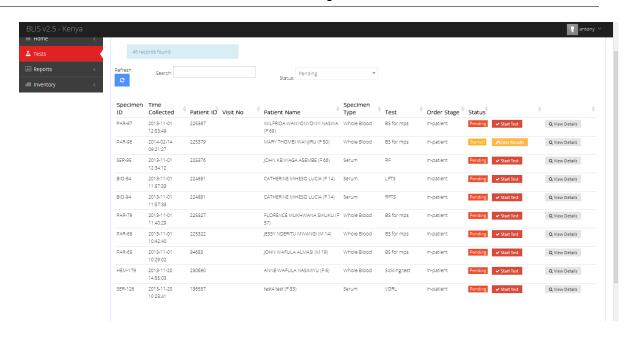

Check that its status is 'Pending'

Click on the 'Start test' button and confirm on the pop-up by clicking 'OK'

The status will change to 'Started' as captured.

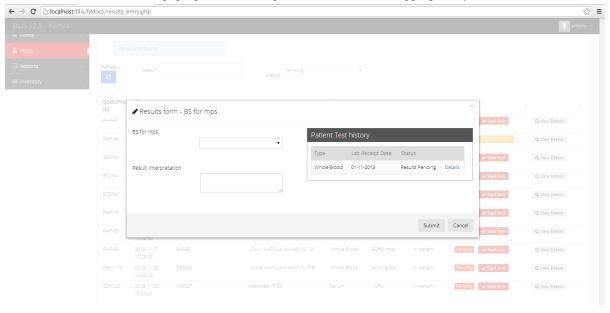

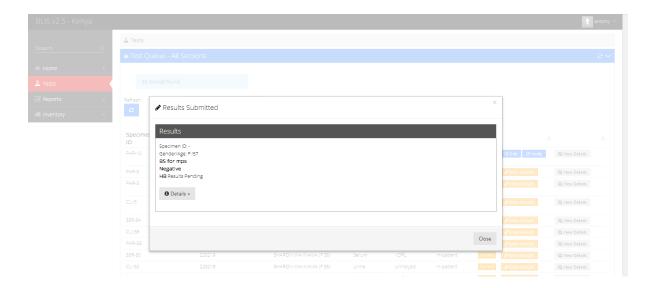

Proceed to perform the test

# **Entering Test Results**

Once through with the tests and results are out, Search the specimen Go to the corresponding row and click on 'Enter results' A pop-up form will be provided to be filled in appropriately.

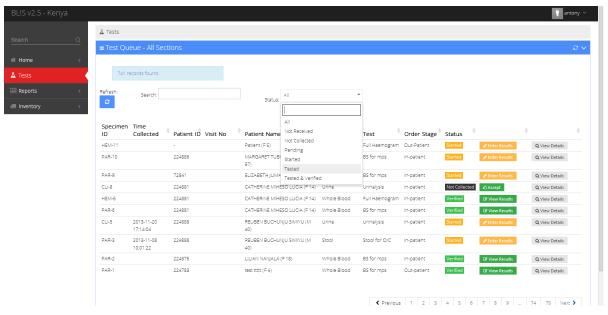

Once done, submit the results using the 'Submit' button to get the following confirmation

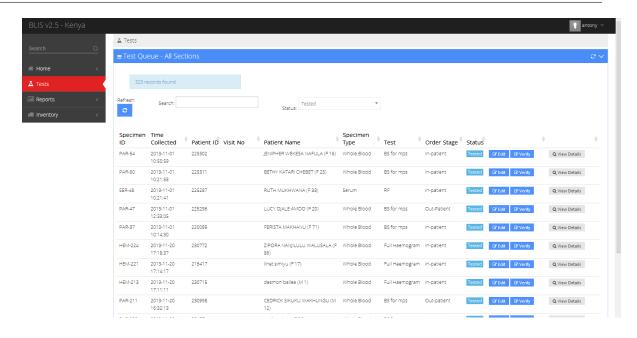

## **Editing Test Results**

Search for the patient, test or specimen OR simply filter using the dropdown under 'Status' select box for 'Tested'.

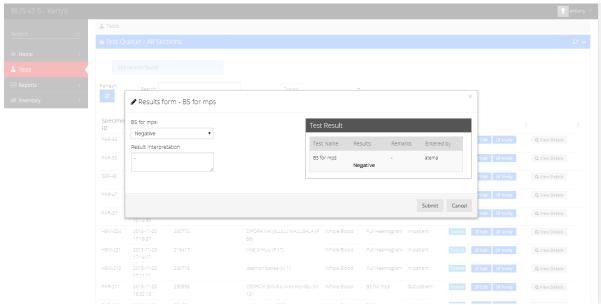

The following table will be given

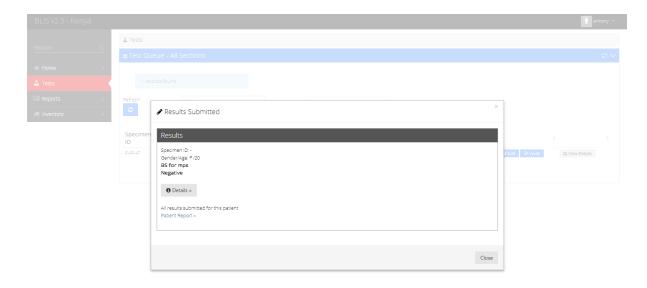

On the corresponding row, click on 'Edit' to open a pop-up form with pre-filled data

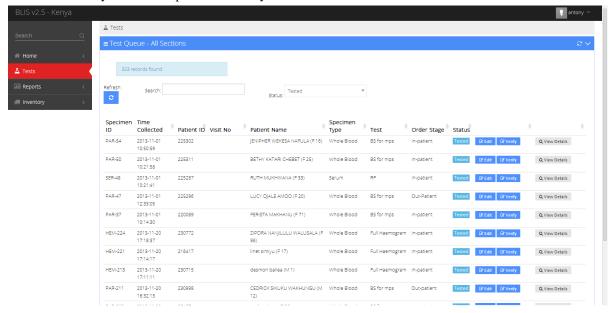

Update the results as appropriate and save the changes by using the 'submit' button.

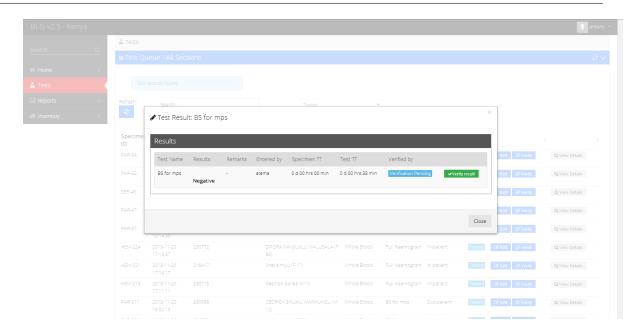

#### **Results Verification**

Here, specific heads of lab sections are assigned results verification privileges. To verify results, you may use the 'Verify' button and proceed to verify the results.

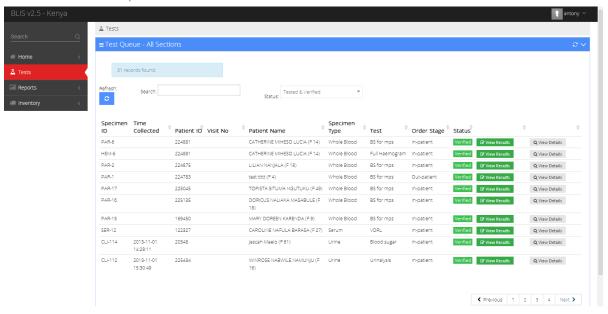

The following pop-up will be displayed

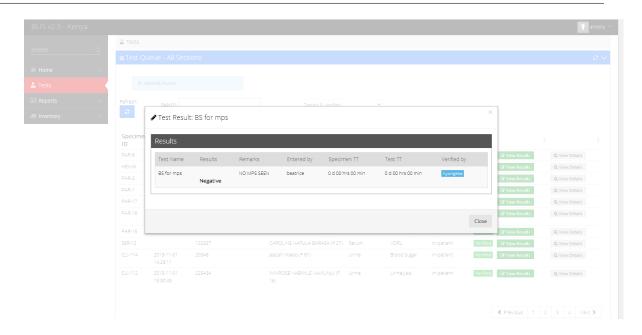

## **Viewing Results**

To view test results, search for the verified test results

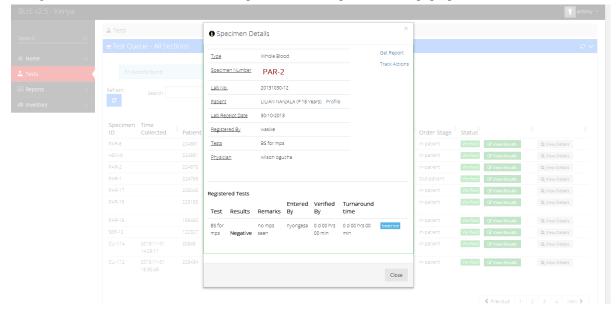

You'll see a 'View results' button Click on the button and a form containing the results of the test shall pop-up

Close the pop-up when done to continue navigating the system.

# **Viewing Specimen Details**

Search for the specimen, patient or test On the corresponding row, click on the 'View details' on the far right column of the table Details of the specimen shall be presented in a pop-up form.

#### **Patient Report**

On the pop-up form presented when viewing details, there is 'Get Report' link Click on that link to open a printable report on a new browser tab

Proceed to print the report if you so wish for a hard copy of the same.
